Bettie,

Wednesday would probably be best. Right now, I am flexible on that day. I may have a noon meeting. It is up to you about meeting in person or by phone. Will you have any additional information from Marketing concerning geographic availability or demographic use of the various tar levels? What about the location of the sites from COVANCE? I guess we don't need these to talk about general guidelines, but that information would be useful - I suppose - to understand the magnitude of potential problems.

Bob

Bob,

I think that you will be able to provide the input that is needed. We can probably talk by telephone or I can swing by your place either in the morning or late afternoon since I come by there on my way in or on my way home. I am available tomorrow until around 3:30. On Wednesday I have a 1 pm conference call. On Thursday I am available after about 10 am.

With best regards,
Bettie

Hi Bettie,

Are you looking for a phone conversation? Who will be included? Today would not work for me and tomorrow I am fairly busy with class, though early afternoon would be okay. Otherwise, Wednesday morning or late afternoon would work. Thursday could be a fall back, late morning or afternoon. I too am out of town on Friday.

Bob

Subject: GEOGRAPHICAL STRATIFICATION PROTOCOL

Bob,

When are you available to discuss setting up some guidelines for the geographical sampling distribution to be used by the sites? If possible, I'd like to have a draft prepared by next week. I won't be in the office on Friday.

With best regards,
Bettie
